EXPERTISE

- Full Stack Development
- MERN Stack
- Web & Mobile Applications
- Problem-Solving
- Digital Experience Design

EXPERIENCE

Geniuswriter.ai (Recent Project)

I developed a suite of AI tools for content creation. Using Next.js Prisma, and Clerk auth for authentication, I integrated Rapid and Replicate API for AI features. The platform offers image generation, text expansion, summarization, voice generation, ChatGPT chatbots, and a story generator. With Stripe integration and 10 free generations for new users.

vibeground.com

Vibeground.com lies its revolutionary platform for connecting fans with models, fostering meaningful interactions between both parties. Through meticulously designed profile creation tools, users on both ends can showcase their personality, talents, and interests, creating a vibrant community hub. Fans gain exclusive access to their favorite models, engaging in direct communication, live events, and personalized content. Meanwhile, models leverage the platform to build their brand, interact with their audience, and cultivate a loyal fan base.
